BENEFITS OF CLOTH DIAPERING

- Save up to \$1,000 PER YEAR not buying disposable diapers. This program pays for itself in just 6 months.
- Be a good steward of our earth! Disposable diapers account for 2-4% of ALL landfill waste.
- Potty train faster and more smoothly. Some estimates claim that cloth diaper children potty train about a year earlier on average. From personal experience, my first child was 100% potty trained by 16 months.
- Protect your child from microplastics, damaging chemicals, and heavy metals found in disposable diapers.
